

# Warehouse Management: Can we change any Report Title as per load view name?

## Scenario:

In any report whatever view is loaded, its shows only Report title as per the Report name. As in Sale Register I have 2 different views created by me as "Supplier Wise" and "Customer Wise" and one default view. But whichever view I load in header label software is showing only "Sale Register".

## Answer:

Unlike earlier opening a Report Layout will add the Layout name along with the Report Header.

The image of [Sale Register](#) given below will explain the process

Sale Register(Customer Wise)
